THIRD QUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2006

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of NEW UNIVERSE INTERNATIONAL GROUP LIMITED, collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (“GEM Listing Rules”) for the purpose of giving information with regard to NEW UNIVERSE INTERNATIONAL GROUP LIMITED. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: 1) the information contained in this announcement is accurate and complete in all material respects and not misleading; 2) there are no other matters the omission of which would make any statement in this announcement misleading; and 3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

BUSINESS REVIEW

Overview

The Group's core business on production of plastic injection molds for domestic appliance, office equipment, medical equipment, automobile parts and kiddy wares sustains satisfactory growth during the period under review. Overall production flows on mold making and plastics injection were smooth and efficient. Sales of mold products and plastic products represented 79.1% and 20.9% respectively of the Group's turnover for the nine months ended 30 September 2006, as compared to 77.3% and 22.7% respectively for the corresponding period in 2005.

Quality Control

The Board is committed to enhance the quality control of its existing production facilities. Training and assessments to gain certification to ISO/TS16949 standard is underway in Suzhou New Universe Tooling and Plastic Limited ("Suzhou New Universe").

Performance of Smartech

Dongguan Smartech Tooling and Plastics Limited (“Dongguan Smartech”) is the Group’s factory situated at the Pearl River Delta, Mainland China, which manufactures export goods for Smartech Manufacturing Limited (“HK Smartech”). HK Smartech and Dongguan Smartech (collectively referred to as “Smartech”) are wholly owned subsidiaries of the Group. The consolidated turnover of Smartech for the nine months ended 30 September 2006 was HK\$38,102,000 representing an increase of 11.9% as compared to the corresponding period in 2005. Mold sales represented 72.3% of the total turnover of Smartech for the nine months ended 30 September 2006, of which 79.1% was sales to Hong Kong and overseas customers and 20.9% was sales in Mainland China. Plastics sales represented 27.7% of the turnover of Smartech in current period, of which 84.5% was sales to Hong Kong and overseas customers, and 15.5% was sales in Mainland China. Core competence of Dongguan Smartech on production of precision molds remained robust. Mold making order backlogs were relieved in the third quarter of 2006. In order to assure quality of the Group’s products, certain old machineries of Dongguan Smartech have been replaced during the period.

Performance of Suzhou New Universe

Suzhou New Universe is the Group’s factory situated at Changjiang River Delta, Mainland China, which confines mainly on manufacture and sale of plastic injection molds and has started out to setup production lines on plastics injection in current period. Turnover of Suzhou New Universe for the nine months ended 30 September 2006 was HK\$15,180,000 representing an increase of 36.5% as compared to the corresponding period in 2005. Mold sales and injection plastics sales represented 96.1% and 3.9% respectively of the turnover of Suzhou New Universe in current period. Export sales and local sales in Mainland china represented 53.6% and 46.4% respectively of the turnover of Suzhou New Universe. Suzhou New Universe is expected to sustain stable growth in Changjiang River Delta of Mainland China.

Investments and finance

During the period, the Group has increased its capital expenditure for enhancing productivity of the factories in Mainland China. In the second and third quarters of 2006, certain old machineries of Dongguan Smartech have been replaced; and amongst the others, a high precision computer-numeric-control wire-cutting machine was acquired.

In January 2006, the Company entered into a contract to acquire a German made high-speed milling machine with standard spindle speed at 42,000 rpm and with high precision options (“Machinery”) at a consideration of EUR205,000 (equivalent approximately to HK\$2,034,000) which constituted a discloseable transaction of the Company under the GEM Listing Rules. The Machinery was originally planned for the use of Dongguan Smartech; but in June 2006, the Board decided to deliver the Machinery to Suzhou New Universe for enhancing its mold-making precision and productivity.

In July 2006, a co-operative agreement (“Co-operative Agreement”) was entered into between the Company and China parties (comprising The District Government of Jingkou, Zhenjiang and State Owned Gongqingtuan Farm of Jiangsu Province) in relation to a property investment and development project to establish wholly foreign owned enterprises in Mainland China with total registered capital of USD25,000,000 (equivalent approximately to HK\$194,000,000) (“Project”) to undertake the construction of dock infrastructure and operation and development of dock and depot facilities in a parcel of vacant land with site area of around 3,100 mu (equivalent to approximately 2,066,665 sq. m.) in the Jingkou District, Zhenjiang City, Jiangsu Province, Mainland China. The Co-operative Agreement constituted a very substantial acquisition of the Company under the GEM Listing Rules. At an extraordinary general meeting of the Company held on 18 September 2006 (“EGM”), the implementation of the Cooperative Agreement and the Project has been approved by the Company’s shareholders. Further details are set out in the announcement dated 3 August 2006, the circular dated 25 August 2006, and the announcement of the EGM results dated 18 September 2006 of the Company.

On 18 September 2006, the Company was granted an interest free loan of USD3,000,000 (equivalent approximately to HK\$23,280,000) from NUEL (“Loan”). Pursuant to the Co-operative Agreement and using the entire proceeds of the Loan as initial capital contributions, the Group established two wholly foreign owned enterprises in Mainland China, namely, New Universe International (Zhenjiang) Port Company Limited (新宇國際(鎮江)港務有限公司) and New Universe International (Zhenjiang) Warehouses Company Limited (新宇國際(鎮江)倉儲有限公司). On 28 September 2006, New Universe International (Zhenjiang) Port Company Limited has made payment of RMB20,000,000 (equivalent approximately to HK\$19,324,000) to the Zhenjiang Jingkou local authority as deposit for the acquisition of land use rights.

The Board’s plan to establish a new factory in Pearl River Delta has been pending; though feasibility studies on the choice of different factory locations have been carrying on until a suitable site could be located.

In view of the continuing competitive operating environment of the mold making industry, the Directors have been formulating business strategies to diversify the business portfolio of the Group with an objective to broaden its revenue base in the long run. Once any plan to diversify the Group’s business becomes concrete, the Board intends to finance the project(s) by the Group’s internal resources, support of the Group’s ultimate holding company, NUEL, and the Group’s current bankers.

Prospects

The business environment for the mold making and plastics production business has been competitive in the recent years. The Board sees optimism on the continuous economic growth in Mainland China and the stability of global economic environment in 2006 and the coming year. Given a marketing and management platform in Hong Kong and the timely backup by NUEL, improvement of Group’s performance in 2006 and beyond will be closely tied to (i) the continuous betterment of the productivity and technology of both Dongguan Smartech and the Suzhou New Universe, and (ii) the feasible plan of business diversification to be implemented.

The Group's mold making facilities of Dongguan Smartech and Suzhou New Universe contain the latest state-of-the-art mold making equipment and technology with core competence on production of plastic injection molds for automobile parts, office equipment, medical equipment and domestic appliance. The Group's experienced production teams provide sophisticated engineering, design services and project management. Quality in-house control of manufacturing of our own molds ensures competitive pricing and reduced lead times. The factories' quality systems have to pass periodical internal audits. From conceptual prototype to final product shipment, the Group's facilities provide complete value chain to satisfy customers' need.

The Board believes the production facilities in Dongguan Smartech and Suzhou New Universe will strengthen the Group's customer base and network surrounding the Pearl River Delta and the Changjiang River Delta respectively in Mainland China. The Board considers that the two factories of the Group are complimentary to each other and enable the Group to become the best molds supplier in Mainland China in the future. The Board remains confident of the Group's sustainable growth and that the Group's performance will be continuously improved.

FINANCIAL REVIEW

Turnover and gross profit

The Group's turnover was HK\$53,282,000 for the nine months ended 30 September 2006, reflecting an increase of 18.0% from HK\$45,158,000 for the corresponding period in 2005. Smartech and Suzhou New Universe have contributed 71.5% and 28.5% respectively of the Group's turnover for the nine months ended 30 September 2006 as compared to 76.3% and 23.7% respectively for the corresponding period in 2005. The Group's gross profit for the nine months ended 30 September 2006 increased by 35.5% to HK\$10,877,000 as compared to HK\$8,027,000 for the corresponding period in 2005. The gross profit margin was 20.4% for the nine months ended 30 September 2006 as compared to 17.8% for the corresponding period in 2005. Facing risks of increasing materials costs, increasing statutory minimum wages and change in tax regulations in Mainland China, the Group's gross profit margin would be inevitably affected in the future notwithstanding most production costs were generally under control in the current period.

Other income

The Group's other income was HK\$623,000 for the nine months ended 30 September 2006, as compared to HK\$3,652,000 for the corresponding period in 2005, representing a significant decrease of income from non-core business in current period.

During the current period, the ratio of selling and distribution expenses to the Group's turnover for the nine months ended 30 September 2006 was 8.3%, as compared to the ratio of 7.3% for the corresponding period in 2005. The current increase in selling and distribution expenses was mainly attributable to increase in sales commission accrued to independent sales agencies and increase in expenditure on overseas promotion affairs as compared to the last corresponding period in 2005.

Administrative expenses

The Group's administrative expenses were HK\$10,039,000 for the nine months ended 30 September 2006, an increase of 4.9% from HK\$9,567,000 for the corresponding period in 2005. During the current period, the ratio of administrative expenses to the Group's turnover for the nine months ended 30 September 2006 was 18.8%, as compared to the ratio of 21.2% for the corresponding period in 2005. The current increase in administrative expenses as compared to last corresponding period in 2005 was mainly attributable to increase in incentive welfare provided to key management staffs in Mainland China, but the overall administration expenses were well-controlled during the current period.

Other operating expenses

The Group's other operating expenses were HK\$2,217,000 for the nine months ended 30 September 2006, an increase of 46.2% from HK\$1,516,000 for the corresponding period in 2005. During the current period, the ratio of other operating expenses to the Group's turnover for the nine months ended 30 September 2006 was 4.2%, as compared to the ration of 3.4% for the corresponding period in 2005. The current increase in other operating expenses as compared to last corresponding period in 2005 was mainly attributable to increase in repairs and maintenance expenses on production facilities.

Finance costs

The total finance costs of the Group was HK\$759,000 for the nine months ended 30 September 2006 as compared to HK\$577,000 for the corresponding period in 2005. The ratio of finance costs for the nine months ended 30 September 2006 to the total interest-bearing borrowings as of 30 September 2006 was 3.8%, which remained the same as compared to a ratio of 3.8% for last corresponding period to 30 September 2005.
